Blitzfire High Elevation Monitor: 2.5" (65mm) BSPF Swivel Rocker Inlet, 2.5" (65mm) BSPM Outlet

The Blitzfire brings 500 GPM (2000 LPM) to your fireground, even with limited personnel. This portable firefighting monitor can be deployed and operated by a single firefighter and can operate unassisted.

Carbide tipped stabilization legs provide stability that compliments the NFPA required tie down strap. A safety shut-off valve shuts the monitor down if it tilts or lifts, bringing safety to the forefront of your portable monitor use.

Weight	11.11kg
Package	No
Horizontal Movement (degrees)	20 left and right of center
Vertical Control	N/A
