10 Year Micro Smoke Alarm

Smart, Small & long life.....

The PSL micro smoke alarm has advanced electronics and a photoelectric smoke sensing chamber that provides early detection of fires.

Onboard software can automatically adjust the sensitivity to adapt to the environment and avoid false alarms. The alarm is powered by a 10-year-long lithium-ion battery. It is an easy-to-install, long-life fire safety solution for your home.

Dimensions: 45mm x 45mm

Easy to install

Low power consumption, eco-friendly and energy saving

Test button

Built-in 10-year lifespan Lithium battery

End of life signal, reminding user of replacement

Self-checking sensor, Mute low-sensitivity mode

Sensor malfunction alarm

Low battery warning

Sound 85dB (3M)

Certificates: CE(0086-CRP-550646), EN 14604 2005, RoHS, ISO9001
